

Summer Analyst

Investment team

Copenhagen Infrastructure Partners (CIP) is a leading fund management company founded in 2012, which currently has eight funds and more than EUR 15 billion under management. Our investments include a wide range of renewable energy and energy infrastructure assets including offshore wind, onshore wind, solar PV, biomass and energy from waste, transmission, distribution, and other energy assets.

The CIP Summer Analyst program is a 10-12 week program, which provides rising seniors with an opportunity to evaluate and execute renewable energy transactions in a fast-paced, entrepreneurial environment.

As a Summer Analyst in our New York City office, you will work closely with members of our investment team on industry research, due diligence and execution of CIP's investments in North America. CIP will constantly seek to challenge and inspire you, while focusing on your learning and personal development. The right candidate will build a strong commercial understanding of renewable energy and energy finance. Furthermore, ambitious and top performing Summer Analysts may receive an offer to join us as a full-time Analyst upon graduation.

Key work areas

- Support with evaluation and execution of potential investments
- Conduct market research and synthesize relevant industry trends across the North American renewable energy industry
- Analysis and monitoring of investment performance
- Ad hoc analyses in close corporation with other Investment Team, Asset Management and Finance Team members

The internship is expected to last 10-12 weeks and will be physically based in New York City.

The successful candidate

CIP is looking for rising seniors, preferably focused in Economics, Business any relevant STEM field. Prospective interns should have an interest in renewable energy and energy finance.

We look for the following in a candidate:

- Excellent academic achievements
- Strong communication skills with excellent written and spoken English
- Great experience in Excel and PowerPoint
- Possess a strong analytical aptitude and has a structured and project-oriented approach to work
- Ability to deliver high quality with a best practice mindset and attention to detail

- Interest in corporate M&A, finance, strategy and renewable energy
- Entrepreneurial mindset and spirit of inquiry
- Strong ability to work independently while still being a team player
- Experience with energy and infrastructure is an advantage, but not a requirement

For any inquiries about the position, please contact Sean Toland (set@cip.dk). Please upload your cover letter, resume and transcripts as soon as possible. Interviews will be held in-person or online (as appropriate) on an ongoing basis as applications are received.

Building Value That Matters

Copenhagen Infrastructure Partners (CIP) is a fund management company founded in 2012, which currently has eight funds and more than EUR 15 billion under management. CIP's current investments include a wide range of energy infrastructure assets including offshore wind, onshore wind, solar PV, biomass and energy from waste, transmission, distribution, and other energy assets like reserve capacity and storage.

A career at CIP means you will have the opportunity to develop and utilize new skills, explore interesting fields and do challenging work that will impact the lives of people around the world. At CIP, we are empowering people to innovate and invest for a better and greener future.

With employees in Europe, North America Asia-Pacific, CIP is a global business. A role in the team will expose you to a dynamic working environment and the opportunity to contribute to high-profile transactions whilst working in a business with the best people in the industry.

CIP's commitment to diversity and inclusion

CIP is committed to creating a diverse environment and is proud to be an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, disability, age, or veteran status.

CIP strives for the best results. A diverse workforce allows CIP to achieve these results through different approaches and solutions to task execution and problem solving.
