

EXECUTIVE OFFICE OF THE PRESIDENT  
COUNCIL OF ECONOMIC ADVISERS  
WASHINGTON, D.C. 20502

**The Council of Economic Advisers is Recruiting Staff Economists and Research Assistants**

The Council of Economic Advisers (CEA) seeks staff economists and research assistants to work on a wide range of economic topics, including energy/environment, health, housing, labor, industrial organization, international finance, international trade, macroeconomics, and public finance. These staff support the research and analysis mission of the CEA by performing economic and econometric analysis, collecting data, completing literature reviews, writing memoranda to White House senior staff, and participating in the policy development process. During the fall, staff economists and research assistants participate in every aspect of producing the *Economic Report of the President (ERP)*, from initial drafting and data collection throughout the editing and publication process. These staff must be detail-oriented as they fact-check all CEA work products and other Administration materials.

A job at the CEA presents exceptional opportunities. We are a small-but-prestigious organization, reporting directly to the President to provide objective economic analysis and advice on current economic policy issues. Our staff interact regularly with the Chairman and Members of the Council and have a chance to contribute to the economic policymaking process. Work opportunities at the CEA extend beyond official job descriptions. Our environment is fast paced and challenging, and staffers with talent and motivation are assigned responsibilities commensurate with their abilities.

Research assistants (RAs) are usually recent college graduates or graduates with 1 – 2 years of work experience. The ideal RA candidate has earned excellent grades in economics and in statistics/econometrics, taken college-level mathematics courses, and written a substantial term paper in economics. The ideal candidate would also enjoy working with data and charts and have strong writing skills.

Staff economists are usually graduate students in economics or public policy who have completed most of their coursework for a Ph.D. For them, a year at the CEA provides a look at the real-world application of economic theories and exposure to a wide variety of public policy issues. Staff economist candidates should possess excellent data and technical skills, as well as strong writing. In addition, candidates should be familiar with (or learn about) relevant literature, able to perform econometric analysis, and able to complete high-level research and analytical projects.

More information on the CEA can be found at [www.whitehouse.gov/cea](http://www.whitehouse.gov/cea). **In order to pass a security clearance, candidates must be American citizens.** Interested students should e-mail their 1) resume, 2) transcript, and 3) a writing sample to [recruiting@cea.eop.gov](mailto:recruiting@cea.eop.gov). In addition, two letters of recommendation from economists (or near economists) should also be sent to the same email address. Applications are accepted on a rolling basis, but we encourage applicants to apply as soon as possible.
