Motivation

- Foundational Model of Voting:
 - Vote if benefit of voting $>$ cost of voting (Downs 1957):
- Recent Empirical Findings:
 - Voting is due to social image (DellaVigna et al. 2017)
 - Voting is habit forming (Gerber 2003; Fujiwara et al. 2016)
 - Intergenerational transmission of voting behavior (Akee et al. 2018)

Motivation

Research Question

- **Claim:** Voting is an area to be studied in cultural economics
- **Question:** Is there a link between historical racial animus and the contemporary voting behavior of blacks?
- **Research Design:** Use historical lynchings to index racial animus

Cultural Beliefs Persist Across Generations

- Nunn and Wantchekon (2011) - find a negative relationship between slave exports and measures of trust over 400 years later
- Voigtlaender and Voth (2012) - find a positive relationship between violent attacks on Jews during the Black Death and anti-Semitic views over 500 years later
- Acharya et al. (2016) - find that political attitudes among southern whites can be traced to the prevalence of slavery

Historical Background

- Reconstruction Act of 1867 changed the voting population in the South (DuBois 1935)
 - 1,000,000 blacks were given the right to vote
 - 300,000 illiterate, poor whites were given the right vote
- Union army commanders sought to protect manhood suffrage
 - Freedmen's Bureau "*advised Negroes about registration and voting and disabused their minds of fears of taxation or military service or reenslavement*" (DuBois 1935)

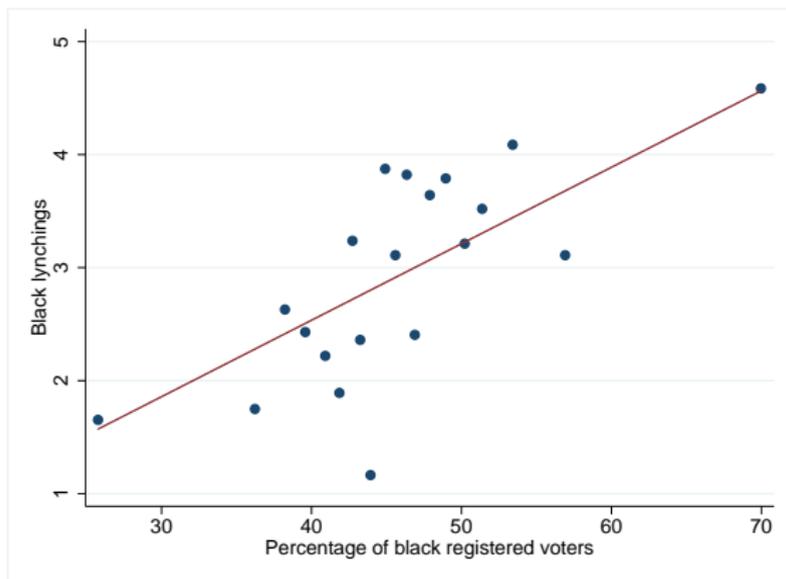

Historical Background

- Voter turnout among black men was between 70% and 90% (Dickerson 2003)
- During Reconstruction, black men voted for white and black Republicans (Redding 2003)
- Black State Delegates
 - 61% in South Carolina
 - 50% in Louisiana
 - 40% in Florida

Historical Background

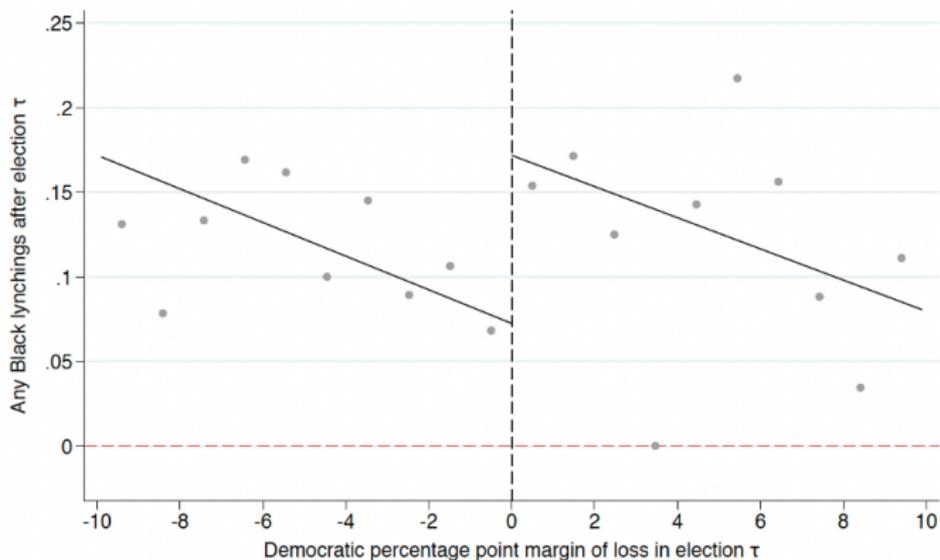

- Blalock's Political Threat Hypothesis (1967)
 - Dominant group believes their political authority is being tested by subordinate group
 - Violence aroused to suppress the black Republican vote (Price et al. 2008)
 - The KKK killed more than 2,000 blacks in Louisiana, two South Carolina legislators, and the President of the Union League
 - Voter turnout among blacks was reduced by 20 percent

Binscatter Plot of Historical Voter Registration in 1867 and Lynchings (County-Level)

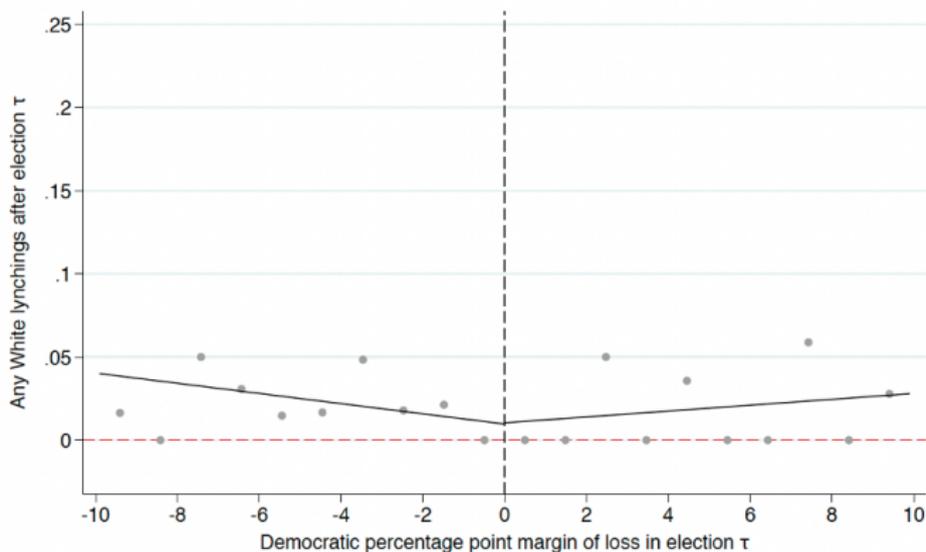

Note: Controls for Percentage of Blacks in 1860
Data source: John Clegg based on tables in Hume and Gough (2008)

Lynchings by Loss Margin in Presidential Elections, 1880–1900 - Black Lynchings

Lynchings by Loss Margin in Presidential Elections, 1880–1900 - White Lynchings

Historical Background

- “But I just decided it was time a few people got put on notice. As long as I live and can do anything about it, niggers are gonna stay in their place. Niggers ain’t gonna vote where I live. If they did, they’d control the government.” (J. W. Milam)

Conceptual Framework

- Builds on existing voting models and cultural anthropology (Nunn and Wantchekon 2011)
- Vote if benefit of voting $>$ cost voting (Downs 1957)
 - Logistical cost (Ashworth 2011)
 - Information cost (Charles and Stephens 2011)
- Cost of voting is high \implies “rules-of-thumb” develop \implies culture of fear/norms of voter apathy
- Lynchings successfully changed behavioral patterns among blacks
- Cultural norms were transmitted to subsequent generations (Akee et al. 2018)

OLS Empirical Framework

To estimate the relationship between historical racial animus and the contemporary voting behavior of blacks

- Ideal Estimation Strategy:

$$\text{voter registration rate} = \beta_0 + \beta_1 \text{racial animus} + \epsilon \quad (1)$$

- Estimation Strategy (Historical and Contemporary controls):

$$\text{voter registration rate}_{cs} = \beta_0 + \beta_1 \text{lynching rate}_{cs} + \beta_2 \mathbf{X}_{cs}^H + \delta_s + \epsilon_{cs} \quad (2)$$

- $\text{voter registration rate}_{cs} = \% \frac{\text{black registered voters}}{\text{black voting-age population}}$

- $\text{lynching rate}_{cs} = \frac{\text{black lynchings}}{\text{black population in 1900}} * 10,000$

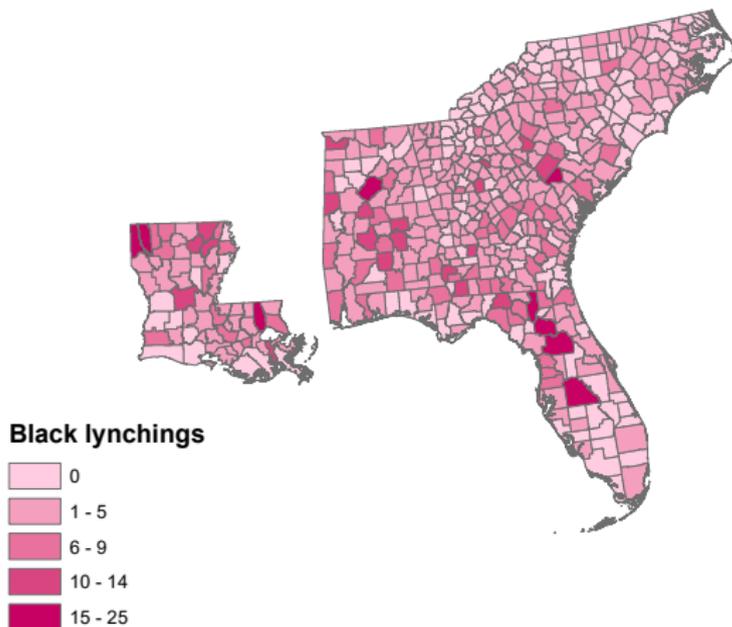

Historical Data (county-level)

- Lynchings: The Historical American Lynching Data Collection Project 1882-1930
- Average farm value, Proportion of small farms, Proportion of free blacks: 1860 Census
- Land inequality: Nunn (2008)
- Number of newspapers: 1840 Census
- County formation: Grosjean (2014)

Contemporary Data (county-level)

- Black (white) registered voters: 2000/04/08/12 Secretary of State Office (AL, FL, GA, LA, NC, and SC)
- Black (white) voting-age population: 2000/04/08/12 Surveillance, Epidemiology, and End Results Program

Map of Black Lynchings

OLS Results (Baseline)

Table 1: Lynching Rates and Black Voter Registration Rates

	Black Voter Registration Rate	
	(1)	(2)
Black lynching rate	-0.666*** (0.183)	-0.507*** (0.192)
Historical Controls	No	Yes
State Fixed Effects	Yes	Yes
Number of observations	256	256
R-Squared	0.498	0.540

Note: Standard errors in parentheses * $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$.

Falsification Exercises

- Do lynchings predict the contemporary voting behavior of whites?
 - Blacks were disproportionately lynched
 - Lynchings are a proxy for historical racial animus
 - White lynchings and White voter registration rates

Falsification Exercises

Table 2: Lynching Rates and Voter Registration Rates

	Black Registration Rate		White Registration Rate	
	(1)	(2)	(3)	(4)
Black lynching rate	-0.507*** (0.192)		-0.026 (0.096)	
White lynching rate		-0.031 (0.104)		-0.017 (0.056)
Historical Controls	Yes	Yes	Yes	Yes
State Fixed Effects	Yes	Yes	Yes	Yes
Number of observations	256	256	256	256
R-Squared	0.540	0.521	0.596	0.596

Note: Standard errors in parentheses * $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$.

Potential Confounders - Contemporary Data

Contemporary Data (county-level)

- Proportion of blacks (whites) w/ some college experience: 2000 Census
- Median age of blacks (whites): 2000 Census
- Proportion married: 2000 Census
- Monthly earnings of blacks (whites): 2000/04/08/12 Census Bureau QWI

Potential Confounders - Republican Party Dominance

- Republican party dominance
 - Many of the states in my sample are Republican states
 - Yet many blacks vote Democratic
 - Blacks may refrain from voting since their vote is not pivotal
 - Data Source: David Leip's Atlas
 - Presidential Election Years: 1996, 2000, 2004, and 2008
 - Republican Party Dominance = Republican Nominee Votes - Democratic Nominee Votes

Potential Confounders - Incarceration Rates

- Blacks have high incarceration rates
- Individuals cannot vote when they are incarcerated
- Blacks who are incarcerated cannot register to vote
- Data Source: Vera Institute of Justice
 - Number of black individuals in jail per 10,000 county residents in 2010

Potential Confounders - Polling Places

- The number of polling places is a proxy for accessibility to voting
- Individuals can register to vote at polling places in some states
- Data Source: Secretary of State Offices
 - AL, FL, GA, LA, NC, and SC in the 2016 Presidential Election
 - Provides the number of polling places

Potential Confounders - Slavery

- Slavery left behind formal and cultural institutions that made it difficult for blacks to vote today (Acharya et al. 2015)
 - Black codes
 - Jim Crow
- Could this link be due to institutions that remain after slavery?
- Data Source: 1860 Census
 - Proportion of slaves in 1860

OLS Results

Table 3: Lynching Rates and Voter Registration Rates

	Dependent Variable: Black Voter Registration Rate						
	(1)	(2)	(3)	(4)	(5)	(6)	(7)
Black lynching rate	-0.491** (0.194)	-0.489** (0.196)	-0.368* (0.194)	-0.514*** (0.196)	-0.561*** (0.166)	-0.427** (0.184)	-0.397** (0.170)
Some college experience or more of blacks	6.489 (6.139)						16.827*** (5.929)
Monthly earnings of blacks		0.003 (0.003)					0.005* (0.003)
Republican party dominance (4-year lag)			-0.194*** (0.037)				-0.070 (0.069)
Incarceration rate of blacks				-0.005 (0.004)			-0.005 (0.004)
Polling place rate (per 10k pop)					1.481*** (0.230)		1.497*** (0.248)
Slaves in 1860 (per 10k pop)						0.002*** (0.001)	0.002*** (0.001)
Historical Controls	Yes	Yes	Yes	Yes	Yes	Yes	Yes
State Fixed Effects	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Number of observations	256	256	256	256	256	256	256
R-Squared	0.542	0.542	0.591	0.543	0.607	0.568	0.657

Note: Standard errors in parentheses *p<0.10,**p<0.05,***p<0.01.

Alternative Explanation - Geographic Sorting

- During the Great Migration, many blacks migrated away from southern counties
- Did blacks with higher voting propensities migrate away from violent southern areas?
 - If so, blacks who were less likely to participate in voting remained
- Examine whether black migrants out of (and into) southern counties with higher lynching rates differ from individuals who did not migrate from these counties

Alternative Explanation - Geographic Sorting

- Data Source: 1940 100% sample obtained from the IPUMS-USA
 - Sample is unique: provides a respondent's current county of residence and county of residence five years prior
 - Allows for individuals who migrated from (to) southern counties to be identified
 - Test whether migrants' individual attributes differ from individuals who remained in southern counties
 - Patterns of mobility out of (and into) southern counties would need to differ as a function of lynchings

Alternative Explanation - Geographic Sorting

Table 4: Lynching Rates and Differences in Attributes between Migrants and Stayers

	(1)	(2)	(3)	(4)	(5)	(6)
Out-Migrants vs. Stayers	Log(wage)	Age	Female	Ninth-grade	Full-time	Rent
Outmigrant × Black lynching rate	-0.004 (0.006)	0.002 (0.030)	-0.004** (0.002)	0.000 (0.002)	0.002 (0.001)	-0.997 (0.815)
Outmigrant	0.500*** (0.018)	-0.447 (0.235)	0.075*** (0.009)	0.107*** (0.012)	-0.034** (0.010)	26.361*** (2.955)
Black lynching rate	0.004 (0.002)	0.009 (0.010)	0.000 (0.000)	-0.001 (0.001)	0.001 (0.000)	-0.343 (0.197)
Historical Controls	Yes	Yes	Yes	Yes	Yes	Yes
State Fixed Effects	Yes	Yes	Yes	Yes	Yes	Yes
Number of observations	89,868	218,832	218,832	185,722	218,832	168,215
R-Squared	0.071	0.006	0.003	0.037	0.005	0.005

Note: Standard errors in parentheses * $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$.

Alternative Explanation - Cultural Voting Norms

- Are lynchings related to cultural voting norms among blacks?
 - Lynchings discouraged political participation \implies behavior passed down
- Data Source: Southern Focus Poll 1992-2001
 - Question: “when you were growing up, how important was it to your parents that you be patriotic”

Cultural Voting Norms

Takeaway

- Low voter registration rates of blacks can be traced back to historical lynchings in counties
 - Unlikely to be driven by
 - Republican party dominance
 - Incarceration rates of blacks
 - Institutions that remained after slavery
 - Geographic sorting
 - Contemporary barriers to voting
- Adds to the new literature in economics that seeks to better understand the role of culture, norms, and beliefs in decision making
